Haappii Billing

Business Profile & Feature Overview

Version 1.0.1

Overview

- Modern POS billing and management system for multi-branch retail & hospitality.
- Business-date driven operations with day-close and audit safety.
- Document generated: 05 Feb 2026.

Version Highlights (v1.0.1)

- Business date enforced across billing and expenses.
- Branch/Shop day close with automatic month close.
- Date-wise stock snapshot stored during day close.
- Profit reporting: date-wise, item-wise, category-wise.

Core Modules

- Sales Billing (quick billing, split payment, GST).
- Table Billing (orders, tables, checkout).
- Inventory & Stock Management.
- Expense Management (branch-wise).
- Reporting & Analytics.
- Admin configuration & access controls.

Key Features

- Role-based access: Admin, Manager, Cashier.
- Branch controls with day-close locks.
- GST inclusive/exclusive calculations.
- Payment modes: Cash / Card / UPI / Split.
- PDF & Excel export with branding.
- SQL log rotation for audits.

Reporting Suite

- Sales Summary, Invoice Detail, Item-wise and Category-wise Sales.
- Profit reports (date, item, category).
- Expense report (date-wise, branch-wise).
- Inventory reports (current, movement, date-wise snapshot).
- Deleted invoices and audit log reports.

Operational Controls

- Close branch day only after all tables are completed.
- Shop close advances business date and resets branch locks.
- All reports aligned to business date operations.
